SUMMARY

B.Tech CSE student and Web Lead with hands-on experience in MERN stack development, full-stack web engineering, and scalable application architecture. AWS Certified Cloud Practitioner with proven ability to build high-performance platforms, integrate REST APIs, deploy production applications, and mentor developers through real-world projects.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, Python, HTML, CSS

Frontend: React.js, TailwindCSS, Bootstrap, Redux, Responsive Design, Vite, EJS

Backend: Node.js, Express.js, REST API, Nodemailer, MongoDB, MySQL, POSTGRES

Tools: Git, GitHub, Postman, Vercel, Firebase, NPM

Concepts: Data Structures, OOP, API Integration, Authentication, Performance Optimization

EXPERIENCE

Indobase – Frontend Developer Intern

Terrarare Solutions Pvt Ltd

Feb 2026 – Apr 2026

Remote | [indobase.in](#)

- Built and maintained frontend for a production-level AI platform using React.js, TailwindCSS, and modern UI architecture.
- Designed responsive layouts, added animations, optimized performance, and deployed frontend builds.
- Worked with REST APIs, Git, GitHub, and resolved merge conflicts in a collaborative development environment.

DSDL Club – Web Lead / Full Stack Developer

KIET Group of Institutions

april 2026 – Present

Ghaziabad, India

- Organized bootcamps, speaker sessions, and tech events for 500+ students, fostering peer learning and technical growth.
- Built a scalable MERN stack website with authentication, API integrations, and achieved 95+ Lighthouse performance score.
- Managed deployments via Vercel and GitHub, ensuring CI/CD best practices and version control efficiency.

PROJECTS

Agentra – Adaptive Multi-Agent AI Platform

React.js | Node.js | Express.js | Redis | MongoDB | Firebase | LangChain

2026

[Live Demo](#)

- Built an adaptive multi-agent AI platform that decomposes complex tasks into DAG-based subtasks and dynamically assigns optimal LLMs for execution.
- Implemented shared memory, trust-based escalation, and specialized AI agents for research, RAG, code generation, and multimodal analysis.

PawConnect India – AI-Powered Animal Rescue Platform

React.js | Node.js | Express.js | MongoDB | FastAPI | YOLOv8 | Socket.IO

2026

[Live Demo](#)

- Built a MERN-based animal rescue and NGO dispatch platform with real-time complaint management, live status tracking, and location-based rescue reporting.
- Integrated AI-powered animal validation, MongoDB geospatial queries, Cloudinary media storage, Nodemailer notifications, and Socket.IO for real-time communication.

Quick Commerce Platform

MERN Stack | Node.js | MongoDB

2025

[Live Demo](#)

- Developed a full-stack quick commerce platform with REST API integration using Node.js, Express, MongoDB, and modern frontend technologies.
- Implemented authentication, cart system, product management, and deployed via Vercel with Git/GitHub version control.

CERTIFICATIONS

AWS Certified Cloud Practitioner – Amazon Web Services

Feb 2026

Complete Web Development Training Courses – Infosys Springboard

Oct 2024

Programming Fundamentals using Python – Infosys Springboard

Nov 2024

Software Project Management Training (PMP) – Infosys Springboard

Apr 2026

EDUCATION

KIET Group of Institutions, Ghaziabad

Bachelor of Technology in Computer Science and Engineering

2023 – 2027

CGPA: 7.8/10.0

ACHIEVEMENTS

- Coordinator, Innotech Fest 2024** – Handled judge coordination and managed operations for KIET's flagship technical fest.
- Web Lead & Instructor, DSDL Club** – Organized bootcamps, technical talks, and guided peers in web development.
- Key Contributor, Indobase Internship** – Delivered industry-grade frontend features in a collaborative team environment.
